REST AND RECOVER – CRANIOSACRAL THERAPY

Craniosacral therapy (CST) is a gentle, noninvasive form of bodywork that addresses the bones of the head, spinal column and sacrum. The goal is to release compression in those areas, which alleviates stress and pain.

CST is most often carried out with the client lying down, fully clothed, in a quiet and peaceful environment. Treatment involves a very gentle touch of the practitioner's hands. This light contact may be applied to the cranium (head), the sacrum (tailbone), the feet, the trunk or any other part of the body as appropriate. The gentle approach of CST is entirely noninvasive.

The subtle interaction of the two systems—brought together by this light contact—stimulates and enhances self-healing mechanisms within the body to respond, release and open up to a more balanced, healthy state. CST seeks to restore the natural position of the bones and can decrease stress from chronic injuries, as well as provide relief from migraine headaches, neck and back pain, temporomandibular joint disorder (the inflammation of the joint that connects the lower jaw to the skull) and more.

Body Vibration Healing Treatments

Native Americans believe that energy links the physical, mental and spiritual selves and that when any one of those aspects of a person is injured, the entire being suffers. Modern science backs up these ancient beliefs. We all know that stress can lead to actual physical pain. Our Body Vibration Healing Treatments are designed to bring energy into balance—healing the physical, mental and spiritual “tears” in our energy to keep us healthy, vital and strong. It’s a luxurious indulgence with lasting benefits that heal body, mind and spirit and strengthen your ability to ward off injury, illness and emotional wear and tear.

GROUNDING – REIKI

Reiki is a Japanese technique for stress reduction and relaxation that also promotes healing. It is administered by “laying on hands” and is based on the idea that an unseen “life force energy” flows through us and is what brings us life. If our life force energy is low, then we are more likely to get sick or feel stress. If it is high, we are more capable of feeling happy and healthy. A treatment feels like a wonderful glowing radiance that flows through and around you. Reiki treats the whole person, including body, emotions, mind and spirit, creating many beneficial effects, such as relaxation and feelings of

peace, security and well-being. Many have reported miraculous results.

This class is a unique experience done at one of our lake houses or on the Blackfoot River. We will start with meditative breathing and then move to finding your balance with some standard paddleboarding. After finding balance, we

VINYASA YOGA

Vinyasa-style yoga classes link posture and breathing together within a series of sequential movements. This process generates heat in the body and helps to build muscular strength and better flexibility. Sanskrit will be chanted at the beginning and end of class. Yoga experience is helpful but not required.

YOGALATES

Yogalates is a technique that involves the stretching and strengthening of all the body's major muscle groups, creating a slender, streamlined shape rather than bulk. It enhances posture, and its main focus is to strengthen the core postural muscles where the abdominal, lower back, pelvic floor and buttock muscles meet. It also fuses the breathing systems of yoga (the ujjayi breathing used to calm the mind) and Pilates (the Pilates lateral thoracic breathing in which the abdominal muscles are used and activated continually throughout the practice).
